NOKEN VALUES - VALEURS NOKEN

R&D - R&D

Noken researches new developments for creating and applying new technologies, constantly updating itself.

Noken mise sur la recherche et le développement pour créer de nouvelles technologies, les appliquer et les mettre à jour en permanence.

NOKEN PRODUCTION CYCLE - CYCLE DE PRODUCTION NOKEN

Noken cares for the product, from the raw material to the end of its service life, through the development, production, or customer satisfaction among other things.

Noken soigne l'ensemble des processus qui vont de la matière première à la fin de la durée de vie du produit, en passant par le développement, la production ou la satisfaction du client, entre autres.

GROUP SYNERGIES - SYNERGIES DU GROUPE

Noken shares knowhow with Porcelanosa Group. Therefore experts, criteria, and objectives are planned as a single brand with a comprehensive bathroom concept.

Noken partage son savoir-faire avec le Groupe Porcelanosa. Dans ce but, les experts, les critères et les objectifs sont organisés sous une seule marque, avec un concept de salle de bains globale.

RELATIONSHIP BETWEEN STAKEHOLDERS - RELATION AVEC LES GROUPES D'INTÉRÊT

Noken establishes partnerships and maintains stable relationships with its stakeholders. Proof of this is the commitment to the 10 principles of the Global Compact; in the areas of human rights, labor standards, environment, and fight against corruption.

Noken crée des alliances et entretient des relations stables avec ses groupes d'intérêt. Preuve en est son adhésion aux 10 principes du Pacte mondial dans le domaine des droits de l'homme, des normes du travail, de l'environnement et de la lutte contre la corruption.

ECO-SUSTAINABLE - ÉCO-DURABLE

Noken Ceramic® has the WATER LABEL and WATER SENSE certifications. Production processes are regulated by the ISO14001 standard. Packaging is recycled as per ECOEMBES.

Noken Ceramic® possède les certifications WATER LABEL et WATER SENSE. Les processus de production sont régis par la réglementation ISO14001. Les emballages sont recyclés par ECOEMBES.

FLEXIBLE DESIGN - DESIGN FLEXIBLE

The R&D+i Department works with leading architects and highly complex designs, creating bathroom concepts that are ahead of their time.

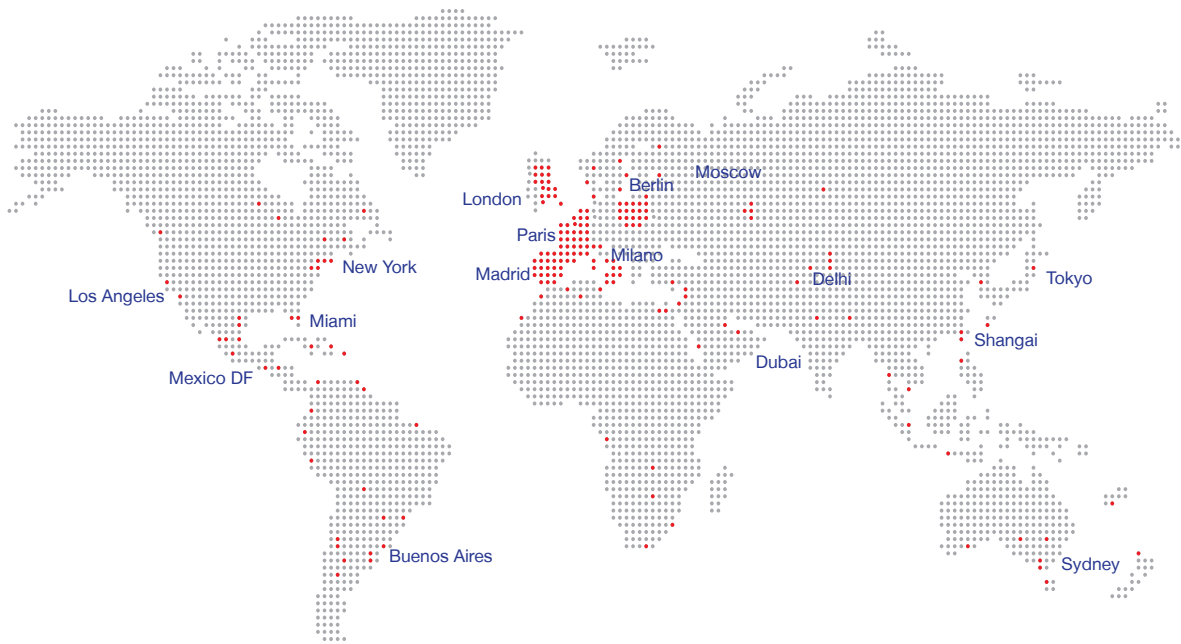

Le Département de recherche, développement et innovation travaille avec des architectes de premier plan sur des projets très complexes pour créer des concepts de salle de bains en avance sur leur temps.

SIMONE MICHELI

Organic shapes
/ Formes organiques

Simone Micheli founded in 1990 the architectural office that bears his name. His creations, sustainable and always environmentally conscious, are characterised by strong identity and uniqueness. Most relevant national and international awards include the International Design Award 2008, Los Angeles, in the category, Interior Design; Interior Designer of the Year at the International Design Award 2008, Los Angeles; the TFE Number One Award 2011, Venice, for interior design; Best of Year honoree 2012, Hospitality Category, awarded by the magazine Interior Design Magazine of New York and recently the "Iconic Award 2014" Interior Winner, awarded by The German Design Council. In 2015 Simone Micheli won the International Hotel & Property Awards, with the project of interior and lighting design of the Barceló Milan Hotel. In the early 2016 Simone Micheli won the Best Of Houzz Award 2016, because of the popularity of his projects among 35 millions of Houzz Community's users.

He has designed the LOUNGE concept for Noken.

Simone Micheli fonda en 1990 l'agence d'architecture qui porte son nom. Ses créations, durables et toujours très respectueuses de l'environnement, se caractérisent par une forte identité et singularité. Parmi les prix nationaux et internationaux que cette agence a reçu récemment, on peut citer l'International Design Award 2008 à Los Angeles dans la catégorie de design d'intérieurs, le prix du Meilleur Designer d'intérieurs 2008 lors des Prix Internationaux de Design, tenus à Los Angeles, le prix TFE Number One Award 2011 à Venise qui récompense le design d'intérieurs, le prix Best of Year Honoree de 2012 dans la catégorie d'hospitalité, décerné par le magazine Interior Design Magazine de New York et, récemment, le Prix Iconic Award 2014 dans la catégorie d'Interior Winner, décerné par le German Design Council. Il a conçu la collection LOUNGE de Noken.

SIR RICHARD ROGERS

The last humanist
/ Le dernier humaniste

Rogers Stirk Harbour + Partners (RSH) is an international architectural practice based in London and best known for pioneering buildings such as the Centre Pompidou in Paris or Lloyd's building in London.

The quality of its designs has been recognised with some of architecture's highest awards, including two RIBA Stirling Prizes. RSH Chairman, Richard Rogers, is the 2007 Pritzker Architecture Prize Laureate, winner of the 2000 Praemium Imperiale Prize for Architecture and the recipient of the RIBA Gold Medal in 1985. Richard was awarded the Légion d'Honneur in 1986, knighted in 1991 and made a life peer in 1996.

Finally, in 2014 he received the Mario Pani Prize (Mexico), Coutts Lifetime Achievement Medal and Royal Designer for Industry. RSH have designed the MOOD sanitaryware line for Noken.

Rogers Stirk Harbour + Partners (RSH) est une agence d'architecture située à Londres, devenue célèbre par la conception de bâtiments d'avant-garde comme le Centre Pompidou à Paris ou le bâtiment Lloyd's à Londres.

La qualité de ses créations a été récompensée par quelques-uns des prix les plus importants dans le domaine de l'architecture comme les Prix Stirling du RIBA (Royal Institute of British Architects), qu'elle a remportée deux fois.

Le président de RSH, Richard Rogers, reçut en 2007 le prix Pritzker ; en l'an 2000 il remporta le prix Praemium Imperiale d'architecture et en 1985 la médaille d'or du RIBA. Il a aussi reçu en 1986 la décoration de l'Ordre national de la Légion d'honneur française. Il a de même été nommé chevalier de l'Empire britannique en 1991 et désigné membre ancien de la Chambre des Lords de Grande-Bretagne en 1996. RSH a conçu la ligne d'équipements sanitaires MOOD de Noken.

LUIS VIDAL

Beyond the concept
/ Au-delà du concept

Luis Vidal founded Luis Vidal + Architects (LVA) in 2004. LVA is a creative platform that offers responsible and quality designs in response to the urban and social challenges of today. In a short period of time, LVA has developed a consistent trajectory expressed in more than 200 projects. Regardless of the scale, the all projects in the studio's portfolio are born with the same DNA that defines LVA: its social, economic and environmental commitment. LVA has attained global status as the Concept and Lead architects of the Terminal 2a at Heathrow Airport (London), recently opened. LVA has also become the first Spanish practice involved in designing a new type of transportation building: a spaceport. The firm has been appointed associate architects to the American engineering and architecture firm HDR for the design of Front Range Spaceport (Denver, Colorado).

LVA have designed the MOOD brassware line for Noken.

Luis Vidal fonda Luis Vidal + Arquitectos (LVA) en 2004. LVA est une plateforme créative qui propose des designs responsables et de qualité en réponse aux défis urbains et sociaux contemporains. En peu de temps, LVA a développé une trajectoire cohérente à travers de la conception de plus de 200 projets. Indépendamment de leur importance, tous les projets de l'agence ont le même ADN, celui qui caractérise l'agence LVA : engagement social, économique et environnemental.

LVA a aussi connu le succès à l'échelle mondiale grâce à la conception du terminal 2a de l'aéroport londonien de Heathrow, récemment inauguré. Il s'agit de la première agence d'architecture espagnole qui a proposé un nouveau type de bâtiment de transport: les ports spatiaux. Elle travaille désormais avec l'agence américaine d'architecture et d'ingénierie HDR pour concevoir le Port Spatial de Front Range à Denver (Colorado).

LVA a conçu la ligne de robinetterie MOOD pour Noken.

DESIGNERS

DAME ZAHA HADID

Liquid architecture
/ *Architecture liquide*

Zaha Hadid, founding partner of Zaha Hadid Architects, was awarded the Pritzker Architecture Prize in 2004 and is internationally known for her built, theoretical and academic work. Each of her dynamic and innovative projects builds on thirty years of revolutionary experimentation and research in the interrelated fields of urbanism, architecture and design.

The MAXXI National Museum of 21st Century Art in Rome, BMW Central Building in Leipzig and Guangzhou Opera House are excellent demonstrations of the practice's quest for complex, dynamic space.

Zaha Hadid Architects continues to be a global leader in pioneering research and design investigation.

Zaha Hadid, fondatrice de l'agence Zaha Hadid Architects, reçoit le prix Pritzker en 2004. Elle fut reconnue internationalement par ses projets et de même par ses études théoriques et académiques. Chacun de ses projets, de nature dynamique et innovatrice, sont basés sur trente années d'expérimentation révolutionnaire, ainsi que sur une recherche approfondie dans les domaines interdépendants de l'urbanisme, l'architecture et le design.

Le musée MAXXI (musée national des arts du XXI^e siècle) à Rome, le bâtiment central de BMW à Leipzig et le Guangzhou Opera House en Chine sont d'excellents témoignages de la quête permanente d'espaces complexes et dynamiques.

Zaha Hadid Architects reste un leader mondial et un pionnier en matière de la recherche en design.

SIR NORMAN FOSTER

Minimalist elegance
/ *Élégance minimaliste*

Norman Foster, founder of Foster + Partners, is responsible for a strikingly wide range of work, from urban masterplans, public infrastructure, airports, civic and cultural buildings, offices and workplaces to private houses and furniture design. He was awarded Royal Gold Medal for Architecture in 1983, the Gold Medal for the French Academy of Architecture in 1991 and the American Institute of Architects Gold Medal in 1994. Also in 1994, he was appointed Officer of the Order of Arts and Letters by the Ministry of Culture in France. In 1999 he became the twenty-first Pritzker Architecture Prize Laureate. In 2009 he was awarded with the Prince of Asturias Arts Award.

Fondateur de Foster + Partners, Norman Foster est l'auteur d'une immense variété de travaux : des plans d'urbanisme, des infrastructures publiques, des aéroports, des bâtiments administratifs et culturels, des bureaux et des centres de travail, mais aussi des maisons particulières et des meubles design. Il reçoit la Royal Gold Medal for Architecture en 1983, la Grande Médaille d'or de l'Académie d'architecture de France en 1991 et la Médaille d'or de l'American Institute of Architects en 1994. En 1994, il est également nommé Officier de l'Ordre des Arts et des Lettres par le Ministère français de la Culture. En 1999, il devient le vingt-et-unième lauréat du Prix Pritzker.

RAMÓN ESTEVE

Mediterranean Architecture
/ *Architecture méditerranéenne*

Ramón Esteve (1964), is the founder and director of his studio since 1991. He has a PhD in architecture from the Polytechnic University of Valencia and an architect from the Escuela Superior de Madrid. With this training he is a creative who directs and develops his activity both in the field of architecture and interior design, as well as in industrial design and artistic direction, both nationally and internationally. Its strength is the Mediterranean architecture, a current well exemplified by emblematic residential projects such as Casa Sardinera or Refugio en la Viña. It is also known for cultural works such as the Center d'Art Pumps Gens or its designs for Vondom or Porcelanosa. His work has been recognized with a multitude of national and international awards. The most recent Land Rover Born 2018 awards. He also combines his work with the teaching task as a professor at the School of Architecture of the Polytechnic University of Valencia and various masters, conferences and workshops.

Ramón Esteve (1964) est fondateur et directeur de son studio depuis 1991. Il est titulaire d'un doctorat en architecture de l'Université polytechnique de Valence et architecte de la Escuela Superior de Madrid. Grâce à cette formation, il est un créateur qui dirige et développe son activité aussi bien dans le domaine de l'architecture et de la décoration intérieure que dans celui du design industriel et de la direction artistique, aux niveaux national et international. Sa force réside dans l'architecture méditerranéenne, un courant bien illustré par des projets résidentiels emblématiques tels que la Casa Sardinera ou le Refugio en la Viña. Il est également connu pour des œuvres culturelles telles que le Centre d'Art Pumps Gens ou ses conceptions pour Vondom ou Porcelanosa. Son travail a été récompensé par une multitude de prix nationaux et internationaux. Le plus récent prix qu'il a reçu est le Land Rover Born 2018. Il combine également son travail avec celui d'enseignement en tant qu'il est professeur à l'École d'architecture de l'Université polytechnique de Valence et à divers masters, conférences et ateliers.

TONO

LIGNAGE

ECOLOGY - ÉCOLOGIE

ECO-FLUSH - CHASSE ECO

Noken includes different ECO flush mechanisms, which make it possible to use up to 25% less water, as the dual flush system uses 3 litres for the reduced flush and 4.5 litres for the full flush, instead of the usual 6 litres.

Noken comporte ainsi divers mécanismes de chasse d'eau ECO qui permettent d'économiser jusqu'à 25% d'eau grâce à une décharge double, la décharge réduite étant de 3 litres et la décharge totale de 4,5 litres, au lieu des 6 litres conventionnels.

COLD-WATER OPENING - OUVERTURE À FROID

The new system just allow open the tap with the handle in central position or turning it to the left hand side, leaving flowing just cold water. In this way, with this new system the burning risk disappears, at the same time you are avoiding the unnecessary use of hot water. The energy consumption linked to the boilers and central heating decrease with this new system.

L'ouverture à froid permet d'actionner le mitigeur seulement en position centrale ou en tournant vers la gauche, soit en laissant uniquement passer l'eau froide. Ainsi, non seulement le risque de brûlure est évité avec ce système mais l'usage non nécessaire de l'eau chaude est également évité. La consommation énergétique est également diminuée du fait du non fonctionnement de la chaudière.

ECOSTOP BUTTON - BOUTON ECOSTOP

Noken has several different thermostatic faucets with ECO buttons. This mechanism enables savings of up to 50% of consumption. When the user reaches half of the flow handle's distance, it stops until the user presses the ECO button to access the thermostatic faucet's total available flow.

Noken propose plusieurs robinetteries thermostatiques avec bouton ECO. Ce mécanisme permet de réaliser une économie allant jusqu'à 50%. Lorsque l'utilisateur actionne le levier de débit jusqu'à la moitié de sa course, ce dernier immobilise jusqu'à ce que l'utilisateur actionne le bouton ECO permettant d'accéder à la totalité du débit du robinet thermostatique.

COLD-WATER OPENING - OUVERTURE À FROID

LIMITERS

The flow limiter can be installed in taps in basins, bidets, exposed shower taps, handshowers, rain shower heads and kitchen taps. In showers, the limiter can be assembled between the tap and the flexible hose, or between the flexible hose and the handshower. 6, 9 and 12 l/minute versions are available.

ECO AERATOR

The ECO aerator always maintains the flow limit at a fixed value of litres per minute regardless of the pressure. This means that depending on the aerator model selected, a saving of 40% to 70% is obtained in the consumption of water and energy as regards faucetry with a conventional aerator. In the example, a saving of up to 60% is achieved at normal pressure, without affecting user comfort in any way. This aerator is available in different versions (3.5 l/min, 5 l/min, 7 l/min).

ECO SPRAY

The Spray version of the ECO aerator is ideal for ensuring maximum

functionality with very low consumption (up to 2 litres per minute). It provides a water spray with sufficient pressure for any type of use and without splashing. This means that depending on the aerator model chosen, savings of between 41% and 83% can be achieved in comparison to a tap with a conventional aerator. Available in different versions (2 l/min, 3.5 l/min).

LIMITEURS

Le limiteur de débit peut être installé sur les robinetteries de lavabos, de bidets, externes de douches, ainsi que sur les douchettes, les ciels de pluie et les robinetteries de cuisines. Pour la douche, le limiteur peut être monté sur le raccordement entre le robinet et le flexible ou entre le flexible et la douchette. Versions disponibles : 6, 9 et 12 l/minute.

MOUSSEUR ECO

L'aérateur ECO maintient en permanence le débit d'eau à une valeur fixée en litres par minutes indépendamment de la pression. Ce qui signifie qu'en fonction du modèle d'aérateur choisi, on réalise une

économie de l'ordre de 40 à 70% en termes de consommation d'eau et d'énergie par rapport à une robinetterie équipée d'un aérateur conventionnel. Dans l'exemple, on parvient à réaliser une économie allant jusqu'à 60% à une pression standard, sans que cela n'affecte d'aucune manière le confort de l'utilisateur. Cet aérateur est disponible en différentes versions (3,5 l/min, 5 l/min, 7 l/min).

SPRAY ECO

La version Spray de l'aérateur ECO est idéale pour maintenir une fonctionnalité maximale avec des consommations réellement basses (jusqu'à 2 litres par minute). Elle assure un flux d'eau en spray d'une pression suffisante pour tous types d'usages et sans éclaboussures. Ceci signifie que, en fonction du modèle d'aérateur choisi, des économies de 41 % à 83 % sont réalisées dans la consommation d'eau et d'énergie par rapport à une robinetterie équipée d'un aérateur conventionnel. Disponible en différentes versions (2 l/min, 3,5 l/min).

BASIN AND BIDET

The flow for these articles is kept within a range of +/- 10% up to 6 bar. The minimum recommended pressure is 1.5 bar.

*Use the aerator fitting included with the brassware

** The flow limiter does not have the CLEAN function

LAVABOS ET BIDETS

Le débit de ces articles est maintenu dans une fourchette de +/- 10 % jusqu'à 6 bar. La pression minimum recommandée est de 1,5 bar.

* Utiliser la clé du mousseur qui est fournie avec la robinetterie.

** Le limiteur de débit n'a pas de fonction CLEAN.

ECOLOGY - ÉCOLOGIE

FORMA

FORMA RIMLESS

EFFICIENT FLUSH

This technology uses two water streams for flushing all the inside of the toilet, enhancing the product's efficiency and getting to all corners.
Grâce à deux sorties d'eau, cette technologie rince tout l'intérieur de la cuvette en améliorant l'efficacité du produit pour arriver dans tous les coins.

NO SPLASH

The accurate conduction of the water on the surfaces of the bowl of the toilet, with the right strength, confers an exceptional operation without splashing.
L'acheminement précis de l'eau sur les surfaces de la cuvette avec la force adaptée permet un fonctionnement exceptionnel et sans éclaboussures.

MORE SILENT

Thanks to its flushing system, it increases comfort as it significantly reduces the noise of flushing operations.
Grâce à son système d'évacuation, il améliore le confort du produit en réduisant considérablement le bruit de la chasse d'eau.

EASY CLEAN

The elimination of the flange guarantees greater continuity of the surfaces inside the toilet, easing its cleaning and a lesser use of disinfectants.
L'élimination de la bride assure une meilleure continuité des surfaces de l'intérieur de la cuvette. Cela permet de faciliter le nettoyage tout en utilisant moins de désinfectants.

NOKEN CERAMIC®

A special glaze that, thanks to ceramic firing at 1250 °C, makes it solid and unalterable. A totally hygienic barrier that creates a smooth surface.
Un émail spécial qui, grâce à la cuisson de la céramique à 1250 °, la rend solide et inaltérable. Une barrière totalement hygiénique qui crée une surface lisse.

INVISIBLE FIXING

The innovative concealed fixing for suspended toilets by Noken gives the product greater visual cleanliness, allowing for easier installation and higher safety.
Grâce à la nouvelle fixation invisible pour les cuvettes suspendues de Noken, le produit procure une sensation de propreté, tout en étant plus facile à installer et plus sûr.

BENEFITS OF WHIRL TUBS - BÉNÉFIQUE DU HYDROMASSAGE

A whirl tub is much more than a luxurious accessory for your home. Bathing in whirl bath tubs for a period of time has a number of benefits, both physical and mental.

L'hydro massage est recommandé par beaucoup de professionnels pour combattre la maladie de notre société : le stress. Les médecins le recommandent de manière thérapeutique ; dans l'actualité, il s'agit d'une recommandation préventive. L'hydro massage peut également combattre l'anxiété et l'insomnie puisque cela fait du bien non seulement à notre corps mais aussi à notre esprit.

Bubble baths have very positive effects on arterial circulation. Pressure activates the circulation of the blood and also benefits the cardiac activity. It also allows relaxation of the muscles and eliminates toxins when opening the pores. These baths are good for relieving stomach ulcers and for recovering from fractures and muscle injuries.

Les bains à bulles exercent des effets très positifs sur la circulation sanguine. La pression active la circulation sanguine et aide l'activité cardiaque. Cela permet aussi de relaxer les muscles et d'éliminer les toxines en ouvrant les pores. Ce type de bains permet de soulager les ulcères d'estomac et de récupérer de fractures et lésions musculaires.

Cellulite is also combated thanks to the pressure jets of these bathtubs. It is good to take a bath after practicing sports.

BENEFITS OF CHROMOTHERAPY - BIENFAITS DE LA CHROMOTHÉRAPIE

Chromotherapy is not only a beautiful play of light and colours. There are several studies certifying the full functionality of this practice, and helps establishing emotional balance for dealing with everyday problems. From a range of cold colours, so related to relaxation and tranquility, to the vital energy given by warm colours, chromotherapy, together with the effect of the different outlets, can lead to highly significant benefits for body and mind.

La chromothérapie n'est pas uniquement un jeu de lumières et de couleurs. Plusieurs études certifient que cette pratique est entièrement fonctionnelle, car elle peut contribuer à établir un équilibre émotionnel qui aide à affronter les problèmes quotidiens. Que ce soit avec une gamme de couleurs froides qui apportent détente et tranquillité, ou avec des couleurs chaudes qui donnent de l'énergie vitale, cette pratique, associée aux effets des sorties d'eau variées, peut apporter des bienfaits très importants pour le corps et l'esprit.

BENEFITS OF MUSIC - BIENFAITS DE LA MUSIQUE

Nowadays, music is not only used as a pastime: it has been shown to bring multiple benefits to the emotional and physical health of human beings. Music is an emotions transmitter; it helps to remember, to get excited, to feel. It connects society since it is an integrating link between people and cultures. Music relaxes, so it is common to listen to music for meditation or for relaxation exercises, because we can "disconnect" our mind and focus our attention on only one thing: the sound.

Actuellement, on n'utilise plus la musique pour uniquement passer le temps ou s'amuser : il est démontré qu'elle apporte de multiples bienfaits à la santé émotionnelle et physique des êtres humains.

La musique transmet des émotions, elle sert à se souvenir, à s'émouvoir, à sentir.

Elle rassemble la société car c'est un lien intégrateur entre les personnes et les cultures.

La musique détend, c'est pourquoi on écoute souvent de la musique pour méditer ou pour faire des exercices de relaxation. Elle permet en effet de « déconnecter » l'esprit et de se concentrer sur une seule chose : le son.

RECOMMENDATIONS FOR BATHING - RECOMMANDATIONS DE COMMENT UTILISER LE BAIN

1

Enjoy the pleasant sensations of air jets with the massaging power of whirl jets

Submergez votre corps autant que vous pouvez et relaxez vous.

2

Select carefully the intensity and position of the jets to your personal preferences.

Sélectionner l'intensité de pression et la position des buses.

3

Relax for soaking and unwind your mind.

Une musique relaxante dans votre bain vous permettra de rêver et de vous éva-der totalement.

4

Do not use the whirl tub while under the influence of drugs or alcohol.

Si vous êtes très fatigué ou sous l'effet de l'alcool ou de médicaments, ne prenez pas votre bain afin d'éviter de vous évanouir.

5

Do not use the whirl tub when you feel sleepy

Si vous avez une sensation de sommeil, sortez rapidement de votre bain.

6

Do not use massaging jets during pregnancy

Si vous êtes enceinte, ne pas activer les buses d'hydro massage non recommandées.

7

The product is designed to be used only by adults. Children, elderly or infirm individuals should only use the whirl tub under supervision.

Attention aux enfants ; toujours les contrôler s'ils sont proche ou dans la baignoire.

8

Make sure you do not activate the hydro system until the tub is filled with sufficient water.

Ne pas activer le système d'hydro massage avant d'avoir un niveau minimum d'eau.

9

The recommended bathing time is 15 to 20 minutes.

Ne pas rester des heures dans le bain. Vous pouvez avoir une baisse de tension. La durée recommandée est de 15-20 minutes. Faites attention au fait que, plus l'eau est froide, plus le bain doit être de courte durée.

ELECTRONICS OPTIONS • OPTIONS ÉLECTRONIQUES

HYDRO

SCREEN KEYPAD - CLAVIER

Extra-slim glass keypad with led signal to activate the HYDRO feature. Screen printing ink is treated at a temperature of 140 °C, with a special anti-moisture protection for protecting the keypad and ensuring the durability of the product. · Clavier en verre ultra-plat avec LED de signalisation pour activer la fonction HYDRO. L'encre de la sérigraphie est traitée à une température de 140°, avec une protection spéciale anti-humidité pour protéger le clavier et garantir la durée de vie du produit.

PUMP - POMPE

With 800W of power, it has a perfect performance for providing a relaxing massage that, together with its low noise level, ensures optimum comfort. The pump is equipped with an electronic level sensor which prevents it from functioning if the necessary minimum water level has not been reached. · D'une puissance de 800 W, elle possède un rendement idéal pour effectuer un massage relaxant avec un faible niveau sonore, ce qui garantit un confort optimal. La pompe est équipée d'un capteur de niveau électronique pour empêcher la mise en route si le niveau d'eau minimum nécessaire n'est pas atteint.

SUCTION - ASPIRATION

With low water retention, the suction mouth meets the highest quality standards. Its safety system prevents any potential blockage and, thanks to its high-quality decorative chroming, any obstruction of the hydraulic circuit is

prevented. · Grâce à une faible rétention d'eau, la bouche d'aspiration est conforme aux standards de qualité les plus stricts. Son système de sécurité empêche tout blocage éventuel et son cache chromé de qualité supérieure permet d'éviter toute obstruction du circuit hydraulique.

HYDRO JET - JET HYDRO

The ergonomics of the hydro jet makes it blend with the bathtub walls, offering a unique massage. Injectors can be tilted manually up to 45° and are therefore completely adjustable. This feature allows the user to choose the exact place where they want to receive the massage. In addition, the flat design of the jets allows the user to get the most out of the feeling provided by the water in contact with the skin.

The trim and the jet nozzle are easily removed, allowing for easy cleaning and replacement (click-type). The pipe emptying system is activated from the keypad. · L'ergonomie du jet hydro, qui se fonde avec les parois de la baignoire, permet d'offrir un massage unique. Les injecteurs, totalement orientables, peuvent être inclinés manuellement jusqu'à 45°. Grâce à cette caractéristique, l'utilisateur peut choisir l'endroit exact où il souhaite se faire masser. Le design plat des jets permet en outre à l'utilisateur de profiter au maximum de la sensation qu'offre le contact de l'eau avec la peau. Le cache et la buse du jet sont faciles à démonter (système à clic), ce qui facilite le nettoyage et le remplacement. On déclenche le système de vidage des tuyaux depuis le clavier.

AIR

SCREEN KEYPAD - CLAVIER

Extra-slim glass keypad with led signal to activate the AIR feature. Screen printing ink is treated at a temperature of 140 °C, with a special anti-moisture protection for protecting the keypad and ensuring the durability of the product. · Clavier en verre ultra-plat avec LED de signalisation pour activer la fonction AIR. L'encre de la sérigraphie est traitée à une température de 140°, avec une protection spéciale anti-humidité pour protéger le clavier et garantir la durée de vie du produit.

BLOWER - BLOWER

With 400W power, the blower makes the air jet inside the bathtub create a soft and enveloping massage. The air circuit installation system itself, and the inclusion of a check valve, ensure that water can never go back and reach the blower. · D'une puissance de 400 W, le blower crée à l'intérieur de la baignoire un jet d'air qui réalise un massage doux

et enveloppant. Grâce au système d'installation du circuit d'air et au clapet anti-retour intégré, l'eau ne peut jamais revenir et atteindre le blower.

AIR JET - JET AIR

The ergonomic design of air jets offers the best massage, providing all the benefits of a professional massage. The high-gloss chromed brass jets are located at the base of the bathtub. Its extra-slim design allows for an unbeatable feeling when the air comes in contact with the skin.

The pipe emptying system is activated from the keypad. · Le design ergonomique des jets d'air permet un massage optimal qui offre tous les bienfaits d'un massage professionnel. Les jets en laiton chromé finition haute brillance sont situés à la base de la baignoire. Leur design ultra-plat procure une sensation incomparable lorsque l'air entre en contact avec la peau. · On déclenche le système de vidage des tuyaux depuis le clavier.

FUSION

SCREEN KEYPAD - CLAVIER

Extra-slim glass keypad with led signal to activate the HYDRO and AIR feature. BLOWER WITH CONTROL - BLOWER AVEC RÉGLAGE

With 400W power, the blower makes the air jet inside the bathtub create a soft and enveloping massage. The air circuit installation system itself, and the inclusion of a check valve, ensure that water can never go back and reach the blower. · D'une puissance de 400 W, le blower crée à l'intérieur de la baignoire un jet d'air qui réalise un massage doux et enveloppant. Grâce au système d'installation du circuit d'air et au clapet anti-retour intégré, l'eau ne peut jamais revenir et atteindre le blower.

HYDRO RELAX SYSTEM - SYSTÈME HYDRO RELAX

Hydraulic circuit divided into three areas: dorsals, feet-sides and bathtub-floor. Option of activating each circuit independently or by combining them. · Circuit hydraulique séparé en trois zones : Dorsale, latérale-pieds et sol-baignoire. Il est possible d'activer chaque circuit séparément ou en les combinant.

AIR-HYDRO JET - JET AIR-HYDRO

The ergonomic design of the jets offers an optimal solution by combining air and water and thus providing a professional-quality massage. Water nozzles have a 45° angle, the air ones have a perpendicular outlet. The combination of the two produces a relaxing effect as well as a lower noise from the bubbles. From the keypad, the user chooses from all available options; water, air, and both. This new technology allows for a new massage sensation. When the water collides with the air bubbles, it breaks them and divides them into hundreds of small bubbles, thus achieving an effervescent-type massage that favors a higher oxygenation that is beneficial for the user's skin. The pipe emptying system is activated automatically. · Le design ergonomique des jets constitue une solution optimale qui combine l'air et l'eau pour offrir un massage de qualité professionnelle. Les injecteurs d'eau ont une inclinaison de 45° et ceux d'air une sortie perpendiculaire. La combinaison des deux entraîne un effet relaxant et permet de réduire le bruit des bulles. À l'aide du clavier, l'utilisateur choisit entre toutes les options disponibles : eau, air et les deux. Cette nouvelle technologie donne lieu à une nouvelle sensation de massage. Lorsque l'eau percute les bulles d'air, elle les éclate pour créer des centaines de petites bulles et faire un massage de type effervescent qui entraîne une meilleure oxygénation, bénéfique pour la peau de l'utilisateur. Le système de vidage des tuyaux se déclenche automatiquement.

DORSAL MICRO JET - MICRO JET DORSAL

Reduced-size extra-slim jet with a gentle water outlet, which produces a soft and relaxing massage on the back. The pipe emptying system is activated automatically. · Jet ultra-plat de taille réduite avec une petite sortie d'eau qui produit un massage doux et relaxant dans la zone dorsale. Le système de vidage des tuyaux se déclenche automatiquement.

MASSAGE PROGRAMS - PROGRAMMES MASSAGE

There are two pre-programmed massages that combine the hydro and air system with chromotherapy. The first one is gentler and the second one more intense; they are differentiated on the keypad by their different colors. · Il existe deux massages pré-programmés qui combinent les systèmes hydro et air avec la chromothérapie. Le premier d'entre eux est plus doux et le second plus intense. Sur le clavier, ils sont représentés par leurs différentes couleurs.

BLOWER WITH CONTROL - BLOWER AVEC RÉGLAGE

With 400W power, the blower makes the air jet inside the bathtub create a soft and enveloping massage. The air circuit installation system itself, and the inclusion of a check valve, ensure that water can never go back and reach the blower. · D'une puissance de 400 W, le blower crée à l'intérieur de la baignoire un jet d'air qui réalise un massage doux et enveloppant. Grâce au système d'installation du circuit d'air et au clapet anti-retour intégré, l'eau ne peut jamais revenir et atteindre le blower.

HYDRO RELAX SYSTEM - SYSTÈME HYDRO RELAX

Hydraulic circuit divided into three circuits: dorsal jets, feet-sides jets and bathtub-floor jets. It has the option of activating each circuit independently or by combining them. · Circuit hydraulique séparé en trois circuits : Jets dorsaux, jets latéraux-pieds et jets-sol baignoire. Il est possible d'activer chaque circuit séparément ou en les combinant.

AIR-HYDRO JET - JET AIR-HYDRO

The ergonomic design of the jets offers an optimal solution by combining air and water and thus providing a professional-quality massage. Water nozzles have a 45° angle, the air ones have a perpendicular outlet. The combination of the two produces a relaxing effect as well as a lower noise from the bubbles. From the keypad, the user chooses from all available options; water, air, and both. This new technology allows for a new massage sensation. DORSAL MICRO JET - MICRO JET DORSAL

Reduced-size extra-slim jet with water outlet. Comfortable, does not discomfort the user, and produces a soft and relaxing massage on the back. · Jet ultra-plat de petite dimension avec sortie d'eau. Confortable, il ne produit aucune gêne pour l'utilisateur et réalise un massage doux et relaxant dans la zone dorsale.

DISINFECTION - DÉSINFECTION

Disinfection program with selection from the keypad. It has a tank that can be refilled with the disinfection liquid available at Noken Porcelanosa Bathrooms. · Programme de désinfection avec sélection à partir du clavier. Dispose d'un réservoir que l'on peut recharger avec le liquide de désinfection disponible chez Noken Porcelanosa Bathrooms.

SOUND SYSTEM - SOUND SYSTEM

Audio system consisting of 4 speakers of the highest quality to offer a unique experience for all the Senses. The user hears the music through the speakers in the traditional way, but also feels the music waves inside the bathtub. The perfect combination for escaping. Equipped with Bluetooth connection. · Système audio qui comprend 4 haut-parleurs de la meilleure qualité pour offrir un plaisir unique à tous les sens. L'utilisateur peut écouter la musique de façon traditionnelle, par les haut-parleurs, ou la sentir à travers les ondes à l'intérieur de la baignoire. La combinaison idéale pour sévader. Équipé de connexion Bluetooth.

INTRODUCTION - INTRODUCTION

ELECTRONICS OPTIONS • OPTIONS ÉLECTRONIQUES

OUTDOOR AIR

SCREEN KEYPAD - CLAVIER

Extra-slim glass keypad with led signal to activate the AIR feature. Screen printing ink is treated at a temperature of 140 °C, with a special anti-moisture protection for protecting the keypad and ensuring the durability of the product.

- Clavier en verre ultra-plat avec LED de signalisation pour activer la fonction AIR. L'encre de la sérigraphie est traitée à une température de 140 °, avec une protection spéciale anti-humidité pour protéger le clavier et garantir la durée de vie du produit.

BLOWER - BLOWER

With 400W power, the blower makes the air jet inside the bathtub create a soft and enveloping massage. The air circuit installation system itself, and the inclusion of a check valve, ensure that water can never go back and reach the blower. *- D'une puissance de 400 W, le blower crée à l'intérieur de la baignoire un jet d'air qui réalise un massage doux et enveloppant. Grâce au système d'installation du circuit d'air et au clapet anti-retour intégré, l'eau ne peut jamais revenir et atteindre le blower.*

JET AIR EXTERIOR - JET AIR EXTÉRIEUR

The ergonomic design of the air jets offers an optimal massage providing all the benefits of a professional massage. The jets in white ABS, located at the base of the bathtub, produce an unbeatable sensation when the air comes into contact with the skin. The pipe emptying system is activated from the keyboard. *- La conception ergonomique des jets d'air offre un massage optimal offrant tous les avantages d'un massage professionnel. Les jets en ABS blanc, situés à la base de la baignoire, produisent une sensation imbattable lorsque l'air entre en contact avec la peau. Le système de vidage des tuyaux est activé à partir du clavier.*

INTRODUCTION - INTRODUCTION

- How does a towel warmer work?

The water that circulates inside the towel warmer transmits heat by convection: the hot water rises, and the cold water descends. The heat is transferred to the bathroom by radiation through the tubes.

- What types of towel warmers are included in our catalogue?

- Water towel warmers (,)
- With a simple heating element (E1), (E2)
- With heating element and thermostat for liquid temperature (EL1), (EL2)
- With heating element and thermostat for room temperature (ET1), (ET2)
- Mixed with simple heating element (M1), (M2)
- Mixed with heating element and thermostat for liquid temperature (ML1), (ML2)
- Mixed with heating element and thermostat for room temperature (MT1), (MT2)

The difference between class 1 and class 2 is that class 2 complies with the specific French regulations for heating elements.

- Comment fonctionne un sèche serviette ?

Le liquide qui circule à l'intérieur du sèche serviette transmet de la chaleur par convection : le liquide chaud monte et le liquide froid descend. La chaleur est transmise à la salle de bains par rayonnement à travers les tubes.

Quels types de sèche serviettes trouve-t-on dans notre catalogue ?

- À eau (,)
- Avec résistance simple (E1), (E2)
- Avec résistance et thermostat pour réglage température liquide (EL1), (EL2)
- Avec résistance et thermostat pour réglage température ambiante (ET1), (ET2)
- Mixte avec résistance simple (M1), (M2)
- Mixte avec résistance et thermostat pour réglage température liquide (ML1), (ML2)
- Mixte avec résistance et thermostat pour réglage température ambiante (MT1), (MT2)

La différence entre les catégories 1 et 2 est que la catégorie 2 satisfait aux exigences spécifiques de la réglementation française pour la résistance.

- How do the water versions work? What type of installations can I find?

The boiler heats the water, and this enters the towel warmer through the inlet valve. The hot water reaches the top of the towel warmer by convection, is distributed through the tubes, and on cooling descends and exits the towel warmer through the lockshield valve, from where it returns to the boiler, where the cycle begins again.

All of the energy in the form of heat that is emitted through the towel warmer tubes to the exterior by radiation is the energy that the water has lost, and as a result represents the calorific energy the boiler will have to produce again in order to continue heating the bathroom.

There are two types of water towel warmers: single tube and dual tube.

- A. - Single tube installation diagram
- Schéma d'installation monotube

- B. - Dual tube installation diagram
- Schéma d'installation bitube

- Comment fonctionnent les versions à eau ? Quels types d'installations trouve-t-on ?

La chaudière chauffe l'eau qui pénètre à l'intérieur du sèche serviette par la vanne d'entrée. Par convection, l'eau chaude parvient à la partie supérieure du sèche serviette, se distribue dans les tubes et, en se refroidissant, redescend et ressort du sèche serviette à travers le détendeur, pour ensuite regagner la chaudière et commencer un nouveau cycle.

Toute l'énergie transmise vers l'extérieur sous forme de chaleur par rayonnement à travers les tubes du sèche serviette est l'énergie que le liquide a perdue et, par conséquent, l'énergie calorifique que la chaudière devra produire de nouveau pour continuer à chauffer la salle de bains.

Il existe deux types de sèche serviettes à eau : monotube et bitube.

INTRODUCTION - INTRODUCTION

- How does the electric version work?

An electric heating element heats the antifreeze liquid (water + alcohol = glycol). As the liquid is heated, it rises by convection to the upper part of the towel warmer, and is distributed along the horizontal tubes. The liquid which is at a lower temperature moves to the lower part of the towel warmer, and comes into contact with the heating element. As it heats up, it rises to the top of the towel warmer, and the liquid which was hot and has released heat by radiation through the towel warmer tubes cools and descends to the lower part. As a result, there is always a cycle of glycol heating up and cooling down, emitting heat through the towel warmer tubes.

The electric towel warmers can be thermostatic (ET1 / EL1) or simple (E1).

Simple towel warmers do not have any type of operating controls. They operate until the simple heating element is activated and turns off. After a while, the heating element turns back on until it turns off again.

One feature of thermostatic towel warmers is that they do not operate constantly at their full power: they operate in the same way as the previous type, but do not need to reach their maximum operating temperature to turn off and back on again. They include a programmer.

- How does the mixed version work?

The mixed towel warmer should operate, whenever possible, with the central heating circuit of the home. It has the advantage that it can be used when the central heating is not turned on (normally during the summer months). This is possible because they include a simple or thermostatic heating element, depending on whether the towel warmer is to be programmed or not. The following safety guidelines must always be taken into account when using the electric heating element:

- The towel warmer must be full of water
- The central heating must be turned off.
- Close the inlet valve so that water is not circulating inside the system.

The mixed towel warmers are also classified as vertical single tube, horizontal single tube and dual tube, and it is important to consider the criteria described above in order to identify one type of installation or the other.

- Description of the electric accessories

- Cap: element that hermetically seals the towel warmer.
- Purge valve: element that hermetically seals the towel warmer, but also allows it to be purged.
- Heating element: element that heats the liquid inside the towel warmer by consuming electrical energy.
 - a._Class I: heating element that complies with safety class I (discharges to earth)
 - b._Class II: heating element that complies with safety class II, obligatory in France (discharges on the element itself).
- Thermostat: electric element that automatically regulates the power supplied by the heating element in order to maintain a constant temperature in the room.

- Comment fonctionne la version électrique?

Une résistance électrique chauffe le liquide antigel (eau + alcool = glycol). En étant chauffé, le liquide monte par convection vers la partie haute du sèche serviette et se distribue dans les tubes horizontaux. Le liquide dont la température est inférieure descend vers la partie basse du sèche serviette et est chauffé par la résistance. En étant chauffé, il remonte vers la partie supérieure du sèche serviette, et le liquide qui était chaud et a déjà transmis de la chaleur par rayonnement à travers les tubes du sèche serviette, s'est refroidi et redescend dans la partie inférieure. De cette manière, il y a toujours un cycle actif de glycol que se chauffe/refroidit et émet de la chaleur à travers les tubes du sèche serviette.

Les sèche serviettes électriques peuvent être à thermostat (ET1 / EL1) ou simples (E1).

Le fonctionnement des sèche serviettes simples n'est pas réglable. Ils fonctionnent continuellement jusqu'à ce que la résistance simple dont ils sont équipés se déclenche et s'éteint. Cette dernière recommence à chauffer après un certain temps, puis elle s'éteint de nouveau.

Les sèche serviettes à thermostat se distinguent par le fait de ne pas fonctionner en permanence à pleine puissance, c'est-à-dire qu'ils fonctionnent de la même manière que les autres, mais qu'ils n'ont pas besoin de parvenir à un maximum pour ensuite s'éteindre, puis fonctionner de nouveau. Ils sont équipés d'un programmeur.

- Comment fonctionne la version mixte?

Le sèche serviette mixte doit fonctionner si possible avec le circuit de chauffage central du logement. Ces sèche serviettes présentent l'avantage de pouvoir être employés même si le chauffage central n'est pas utilisé (normalement pendant la saison estivale). Ceci est possible grâce à une résistance simple ou avec thermostat, selon qu'une programmation est nécessaire ou non. Les précautions suivantes doivent être prises pour utiliser la résistance électrique:

- Le sèche serviette doit être plein d'eau.
- Le chauffage central doit être éteint.
- Fermer le robinet d'entrée pour empêcher l'eau de circuler à l'intérieur du système.

Les sèche serviettes mixtes sont également classés en monotubes verticaux, monotubes horizontaux et bitubes, et les critères décrits plus haut doivent être pris en considération pour pouvoir identifier une installation ou une autre.

- Description des accessoires électriques

- Bouchon : élément qui ferme hermétiquement le sèche serviette.
- Purgeur : élément qui ferme hermétiquement le sèche serviette et permet en même temps de purger celui-ci.
- Résistance : élément qui chauffe le liquide contenu dans le sèche serviette en consommant de l'énergie électrique.
 - a._ Classe I : résistance qui répond à la classe de sécurité I (décharge à la terre).
 - b._ Classe II : résistance qui répond à la classe de sécurité II, obligatoire en France (décharge sur l'élément lui-même).
- Thermostat : élément électrique qui régule automatiquement la puissance fournie par la résistance pour maintenir la température constante dans la pièce d'habitation.

INTRODUCTION - INTRODUCTION

- Description of hydraulic accessories

- Cap: element that hermetically seals the towel warmer.
- Purge valve: element that hermetically seals the towel warmer, but also allows it to be purged.
- Valve: element that allows water from the boiler to enter the towel warmer.
 - a._Dual tube: installation in which water enters and leaves the towel warmer through different connections. Requires an inlet valve and a lockshield valve on the outlet.
 - b._Single tube: installation in which water enters and leaves the towel warmer through the same connection. Requires a specific valve that allows water to exit the towel warmer at the same time.
- Lockshield valve: element that allows water to leave the towel warmer, and then return to the boiler.
- Connector joint: element to connect the valve or lockshield valve and the tubing in the heating installation. These will depend on the diameter and material used for the tubing in the installation.

- Description des accessoires hydrauliques

- Bouchon : élément qui ferme hermétiquement le sèche serviette.
- Purgeur : élément qui ferme hermétiquement le sèche serviette et permet en même temps de purger celui-ci.
- Vanne : élément qui permet l'entrée de l'eau provenant de la chaudière dans le sèche serviette.
 - a._ Bitube : installation dans laquelle l'entrée et la sortie de l'eau du sèche serviette s'effectuent par des raccordements différents. Elle nécessite une vanne à l'entrée et un détendeur à la sortie.
 - b._Monotube : installation dans laquelle l'entrée et la sortie de l'eau du sèche serviette s'effectuent par le même raccordement. Elle nécessite une vanne spécifique permettant en même temps la sortie de l'eau.
- Détendeur : élément qui permet la sortie de l'eau du sèche serviette et de la renvoyer vers la chaudière.
- Raccord d'union : élément qui permet l'union entre la vanne ou le détendeur et la tuyauterie de l'installation de chauffage. Son diamètre et son matériau dépendent de la tuyauterie de l'installation.

- Description of accessories for the mixed version

- T-connector: allows a dual tube valve and electric heating element to be installed at the same time.

- Description des accessoires pour la version mixte

- Raccord en T: permet d'installer en même temps une vanne bitube et une résistance électrique.

T-connector
Raccord en T

When I order a water towel warmer (.), what does it include? What additional accessories do I have to order?

1. Single tube vertical/horizontal towel warmer for central heating installation.

Si je commande un sèche serviette à eau (.), que comprend-il, quels compléments dois-je commander ?

1.- sèche serviette pour chauffage central installation monotube verticale / horizontale.

INTRODUCTION - INTRODUCTION

2. Dual tube towel warmer for central heating installation

2.- sèche serviette pour chauffage central installation bitube

The purge valve and wall mounting brackets are included with the water towel warmer. The lockshield valves will be ordered in chrome when the towel warmer is white or chrome. The vertical or horizontal single tube valve is always in chrome finish, as is the ½" towel warmer cap. The codes for the valve and lockshield valve shown here are for the chrome finish.

Le purgeur et les fixations au mur sont fournis avec le sèche serviette à eau. Les raccords doivent être commandés en finition chrome si la finition du sèche serviette est chrome ou blanche. La vanne monotube verticale ou horizontale est toujours en finition chrome, de même que le bouchon ½ du sèche serviette. Les codes de la vanne et du détendeur qui sont indiqués ici sont ceux qui correspondent à la finition chrome.

When I order a mixed towel warmer (M1, M2), (ML1, ML2) or a mixed towel warmer with thermostat (MT1, MT2), what does it include? What additional accessories do I have to order?

Si je commande un sèche serviette mixte (M1, M2), (ML1, ML2) ou (MT1, MT2), que comprend-il, quels compléments additionnels dois-je commander ?

3.- Mixed towel warmer for horizontal/vertical single tube installation.

3.- sèche serviette mixte pour installation monotube horizontale / verticale.

The codes for the valves and lockshield valves shown here are in chrome. For prices for connectors in other finishes, see the comments for the water towel warmers shown above.

Les codes indiqués des vannes et des raccords sont valables pour la finition chrome. Pour pouvoir établir un devis des raccords dans d'autres finitions, il suffit de tenir compte des indications précédentes pour les sèche serviettes à eau.

In both cases (horizontal and vertical single tube), it does not matter if the valve and heating element are on the left or on the right; they can be installed on either side without affecting the operation of the towel warmer in any way.

Dans les deux cas (monotube horizontal et monotube vertical), il est indifférent que la vanne et la résistance soient installées à droite ou à gauche, n'importe lequel de ces emplacements est parfaitement valable et n'affecte d'aucune manière le fonctionnement du sèche serviette.

INTRODUCTION - INTRODUCTION

4.- Mixed towel warmer for dual tube installation

4.- sèche serviette mixte pour installation bitube

5.- Electric towel warmer. Includes all the necessary componets to assemble.

5.- Radiador eléctrico. Ya incluye todos los componentes para su puesta en marcha.

In this case, the towel warmer to be priced is not a simple towel warmer (°) as in the previous cases, but instead we are now pricing a mixed towel warmer (M1) or thermostatic mixed towel warmer (MT1 / ML1). These already include the heating element, and as a result we do not have to search for the corresponding model and include it in the price, as with mixed single tube towel warmers.

Dans ce cas, le sèche serviette n'est plus un sèche serviette simple (°), comme c'était le cas dans toutes les hypothèses précédentes, mais bien un sèche serviette mixte (M1) ou mixte à thermostat (MT1 / ML1). Ces derniers sont fournis avec la résistance, ce qui évite de devoir rechercher la résistance correspondante et d'établir son devis, comme dans le cas des sèche serviettes monotubes mixtes.

The mixed towel warmer for single tube installation includes: simple towel warmer, purge valve, wall mountings, simple heating element (E1) or thermostatic heating element (ET1 / EL1).

Le sèche serviette mixte pour installation bitube est fourni avec les éléments suivants : sèche serviette simple, purgeur, fixations au mur, résistance simple (E1) ou résistance avec thermostat (ET1 / EL1).

In the case of dual tube towel warmers, it is important to bear in mind that as they have a valve and lockshield valve on the same side, the "l" distance of the towel warmer (between the centre of each tube) is important during installation, as although all of the models are standard, we must measure the distance between the tubes in the wall in order to decide which towel warmer to install.

Dans le cas des sèche serviettes bitubes, il est nécessaire de tenir compte du fait que, puisqu'il y a une vanne et un détendeur de chaque côté du sèche serviette, la distance « l » du sèche serviette (la distance de centre à centre de tuyau) est importante pour procéder à l'installation car, même si tous les modèles sont standard, il est nécessaire de mesurer la distance existante entre les tuyaux sur le mur afin de pouvoir déterminer quel sèche serviette doit être mis en place.

Obviously, we will have to take the distances H and L into account when installing the towel warmer in the bathroom, although in the case of dual tube installations the distance "l" will have to be considered, as if this is smaller, modifications will have to be made to the tube installation, as it will impossible to do this with the towel warmer.

Il est évident que les distances H et L doivent être prises en compte pour situer le sèche serviette dans la salle de bains, mais c'est pour les installations bitubes que la distance l doit être prise en considération car, si elle est inférieure, il est alors nécessaire de réaliser des modifications sur l'installation du tuyau, du fait de l'impossibilité des réaliser celles-ci sur le sèche serviette.

The distance "l" will be increased or reduced by 69mm if we install a Noken T-connector in a mixed installation. This is because we will move the valve or lockshield valve in this position to the left or right, in order to be able to fit the electric heating element in its place.

Cette distance "l" doit être augmentée ou réduite de 69 mm si un raccord "T" de Noken est mis en place pour réaliser une installation mixte. Cette mesure se doit au fait que la vanne ou le détendeur destiné à ce creux se déplacent vers la droite ou vers la gauche, pour pouvoir disposer la résistance électrique à son emplacement.

INTRODUCTION - INTRODUCTION

- How do I calculate the necessary power depending on the geographic area?

Normally, the towel warmers are used as a towel dryer, in which case we should not be too concerned about its size. A small or medium-sized towel warmer will do this job perfectly well. If we want to completely replace the towel warmer in the house and use the towel dryer as central heating, we will have to use the following formula:

Power required = Cubic metres¹ x Zone coefficient²
 Puissance nécessaire = mètres cubes¹ x coefficient de climat²

¹ Cubic meters = Bathroom surface x bathroom height = Side x side x height
¹ Mètres cubes = surface de la salle de bains x hauteur de la salle de bains = côté x côté x hauteur

² Zone coefficient:
² Coefficient de climat:

- Comment calculer la puissance nécessaire en fonction du climat de la région?

Les sèche serviettes sont normalement utilisés comme sèche-serviettes. Dans ce cas, la taille du sèche serviette importe peu. Un sèche serviette de petites ou moyennes dimensions remplit parfaitement cette mission. S'il est souhaité de remplacer complètement le sèche serviette existant à la maison et d'utiliser le sèche-serviettes comme chauffage central, il convient d'appliquer la formule suivante:

Each country uses a different type of measurement for power. In Spain it is Kcal/hour, in the UK BTU, etc.

Chaque pays emploie une unité de mesure de la puissance. L'unité Kcal/heure est utilisée en Espagne, tandis que c'est l'unité BTU qui est utilisée au Royaume Uni...

- Hot zone: Southern Spain, Canary Islands, Middle East, etc.
- Warm zone: Eastern Spain, Mediterranean Europe, temperate maritime zones, etc.
- Cold zone: Central and north-western Spain, central Europe, France, UK, etc.
- Freezing zone: Eastern Europe, former USSR, Scandinavia, etc.

- Climat chaud : Sud de l'Espagne, Canaries, Proche Orient.....
- Climat tempéré : Est de l'Espagne, Europe méditerranéenne, zones maritimes tempérées...
- Climat froid : centre et Nord-Est de l'Espagne, centre de l'Europe, France, Royaume Uni ...
- Climat très froid : Est de l'Europe, ex URSS, Scandinavie...

As an example, we will use a bathroom in the city of Valladolid (Spain), measuring 2 x 2.5 metres. If we know that it is 2.35 metres high, the calculation would be:

Kcal/ required = (2 x 2.35 x 2.5) x 60 (zone coefficient) = 705 Kcal/hour

In the table of properties for each towel warmer in the price list, the following information is shown:

L mm	600
I mm	573
H mm	1133
Tubo N°	28
Kcal/h	798
Watt	932
Resist. w	750
Fij. N°	4

These are the maximum Kcal/hour a radiator with these properties would generate. It's about the maximum number of kcal/hour that a towel warmer with these characteristics would produce.

zone climat	Kcal/h	watt	BTU
hot chaud	40	50	160
warm tempéré	50	60	200
cold froid	60	70	240
freezing très froid	70	80	280

Prenons comme exemple une salle de bains à Valladolid (Espagne) de 2 x 2,5 mètres. Sachant que la hauteur de cette dernière est de 2,35 mètres, le résultat serait :

KCal / nécessaires = (2 x 2,35 x 2,5) x 60 (coefficient de climat) = 705 kcal / heure.

Le tableau de caractéristiques reproduit sur le tarif pour chaque sèche serviette fait état de l'information suivante:

1 watt = 0,86 Kcal/h
1 Kcal/h = 1,16 watt

Before choosing your towel warmer, check the technical information to make sure that the heating output fits your requirements. Our products are designed to keep the towels dry and are not always suitable as a primary heating source for your bathroom.

Avant de choisir votre sèche serviette, veuillez bien vérifier les caractéristiques techniques afin d'être certain que la puissance de chauffe corresponde à vos nécessités. Nos produits sont pensés pour sécher des serviettes et ne sont pas toujours dotés d'une puissance suffisante pour servir de source principal de chaleur pour la salle de bain.

The electric towel warmers do not have an even distribution of heat, the upper part will always be hotter than the lower part.

Les sèche serviettes en version électrique n'offre pas de répartition uniforme de la chaleur. La zone la plus haute sera plus chaude que la zone basse du sèche serviette.

HOTELS

The Hotels structure is made with natural ash wood. This may lead to changes in hue and grain pattern between the different pieces.
La structure Hotels est fabriquée avec du bois naturel en frêne. Cela peut provoquer des changements dans le ton et le dessin de la veine entre différentes pièces.
