Premium
COLLECTION
PORCELANOSA

#Porcelanosa Premium Collection reúne toda una gama de productos que confluyen para crear los espacios más exclusivos del Grupo Porcelanosa.

Una selección de productos y materiales definidos por tres rasgos comunes: exclusividad, distinción y elegancia. Griferías en acabados rosé, titanio o plata; piedras y maderas naturales, cocinas en acabados especiales o cerámicas de grandes formatos son algunos de los productos que conforman esta colección y consiguen crear con ella espacios con personalidad y exclusividad propias.

Un concepto que gira en torno a la sofisticación, la calidad y la calidez de los materiales en busca del equilibrio y la excelencia en la materialización de espacios con distinción.

#Porcelanosa Premium Collection brings together a range of products that come together to create the most exclusive settings from Porcelanosa Grupo.

A selection of products and materials defined by three common features: exclusivity, distinction and elegance. Taps with rosé, titanium or silver finish; woods and natural stones, kitchens with special finishes or large format ceramic tiles are some of the products that are part of this collection and help to create spaces with their own personality and exclusivity.

A concept turning around sophistication, quality and warmth of the materials, always looking for balance and excellence when creating spaces with distinction.

ANTRACITA

MICRO-STUK design butech

The current architecture demands for new materials for decoration and interior design. Thus, the PORCELANOSA Group companies have incorporated a wide variety of materials to complement the ceramic tiling that characterize PORCELANOSA: mosaics, wood and natural stones from L'ANTIC COLONIAL, technical porcelain tiles and XLIGHT from URBATEK, KRION from SYSTEM- POOL and now micro-stuk design from BUTECH.

The butech micro-stuk design is a type of fine cement rendering that modified with high strength and durability polymers, becomes an outstanding and stylish covering, fine and tough at the same time. butech micro-stuk design represents the best example of the chemical and technologic evolution, using the traditional clinker of the cement production and adding it other products that transform chemically the cement and make it a thinner product with extreme hardness and great flexibility. This way, we obtain a covering without joints that does not fissures and whose strength and hardness are way above of the traditional cement.

Recommended uses:

- Indoor dry and wet room walls.
- Shower cabins.
- Worktops and furniture covering.
- Exterior façades.

On request, it can be also used on floors, both indoors and outdoors.

Main characteristics:

- It is continuous without joints across the covering.
- Only 2 mm thick.
- Suitable for most building substrates.
- It does not need to remove the existing material. Reduce the debris production.
- It doesn't need maintenance.
- If required, it can be waterproofed.
- It is fire resistant.
- Available in a wide range of colors and shades of each color.
- Can be combined with many other different materials such as ceramic tiles.
- Similar prices to tile installation.

Natural stone and tile fixing

Cement-based adhesives for ceramic tiles and natural stone.

super-flex S2

super-flex S2 is a type C2 TE S2 high-performance no dust cement-based adhesive, as per EN 12004, for laying all kinds of ceramic tiles on the most used substrates in the building industry. Specially recommended for laying large format, thin porcelain tiles like XLIGHT from URBATEK.

Recommended applications:

Indoor coverings with XLIGHT ceramic tiles.
Laying of ceramics in refurbishing jobs.
Indoor and outdoor porcelain tile coverings.

White 15 Kg

B12909017 100142757

tixocem plus

tixocem plus is a C1 TE class cement-based adhesive, suitable for fixing **porcelain tiles** on cement-based substrates or flexible ones like **plasterboard**. Bedding up to 10 mm thickness.

Recommended applications:

Wall coverings over plasterboard.
Porcelain tile indoor floors.

White

B11906007 100043280

flexitec n

flexitec n is a C2TE cement-based adhesive, suitable for fixing stoneware outdoor and on flexible substrates like plasterboard.

Recommended applications:

Wall tiles on plasterboard.
Indoor and outdoor floor tiles.

White

B12902003 100004232

Grey

B12901002 100004230

one-flex n

one flex n is a high-performance, C2 TE S1 class cement-based adhesive, suitable for laying all coverings manufactured by PORCELANOSA Group on substrates typically used in building projects.

Recommended applications:

Large-format wall and floor tiles (e.g. 31.6 x 100, 59.6 x 59.6, 59.6 x 120 cm).
Indoor and outdoor porcelain tiles.
Swimming pools.

White

B12903004 100004234

Grey

B12904005 100004236

Substrate preparation and waterproofing

Waterproofing substrates. Self-levelling and smoothing compounds. Primers. Uncoupling substrates.

sylastic

sylastic is a two-component waterproofing mortar. It stands out for its high flexibility and superior bonding strength, whatever the substrate is. For professional use.

Recommended applications:

Waterproofing terraces and flat roofs.
Swimming pools, urban décor, and drinking water tanks.

Bag: 24 kg

B85900004 100072729

Bucket: 8 kg

B85900005 100072730

level 1 pro

level 1 pro is a fast hardening, self-levelling mortar for levelling and regularizing substrates for all kinds of floor tiles. 2 to 10 mm thickness. Specially recommended for laying rectified ceramic floor tiles.

Recommended applications:

Substrate regularization in refurbishing jobs.
Indoor large size ceramic floor tile coverings.
Indoor rectified floor tile coverings.

Bag: 25 Kg

B15901005 100141151

super-prim

superprim is a water-based primer made of acrylic resins and siliceous sands to prepare the substrate before using adhesives or self-levelling mortars.

Recommended applications:

Primer for self-levelling mortars.
Primer on existing floor tiles.
Primer on plasterboard or anhydrite substrates.

Bucket: 10 kg

B57500002 100123220

lamitech n

lamitech n is a multi-layer waterproof polymeric membrane, specially conceived to protect tiled floors from movements in the substrate. For professional use.

Recommended applications:

Uncoupling floor surfaces from the substrate.
Laying ceramic tiles on top of deformable substrates (wood).
Waterproofing and restoring terraces.

Roll: 5 sqm.

B89500011 100089879

Natural stone and tile grouting

Materials for tile grouting.

s-107 n

s-107 n is a neutral silicone filler for joint sealing. Especially recommended for sealing expansion joints. Suitable for indoor and outdoor.

Recommended applications:

Joint sealing over among materials that are affected by acid attack.
Expansion joint sealing in floors. Even perimeter joints.

Natural stone and tile grouting

Materials for tile grouting.

epotech nature **NEW PRODUCT**

epotech nature is a new micro grain porcelain grouting material for tiles inspired by Nature. It has been specially developed for porcelain tiles, that reproduces the appearance and texture of wood, like par-ker from PORCELANOSA Grupo. Professional use only.

Recommended applications:

Floor and wall tiles with wood finish.
Wall and Floor mosaic coverings.
Par-ker from PORCELANOSA Grupo.
Ston-ker from PORCELANOSA Grupo.
URBATEK from PORCELANOSA Grupo.

Main Characteristics:

Wood design; it reproduces the appearance and texture of the wooden floors.
Epoxy material easy to apply and clean.
Waterproof joint, no water absorption.
Hypoallergenic and bacteriostatic.
Tile joints up to 5 mm.

Wet rooms and shower trays

Waterproofing membranes and shower trays.

imperband

imperband is a waterproof membrane, specially conceived for waterproofing indoor tiled walls and floors.

Characteristics:

Maximum waterproof protection using a product of a minimum thickness (0.5 mm). Tiled surfaces are laid directly on top of the waterproofing membrane. Good resistance to chemicals. Does not deteriorate over the course of time. Swift and easy to use.

Recommended applications:

For residential bathrooms and wet rooms.
For public toilets and showers.

Roll: 30 sqm.	B84901001	100006213
Roll: 5 sqm.	B84901006	100006218

kit imperband

imperband kits are waterproofing systems for wet rooms, made up of a PVC drain and incorporated waterproofing sheet.

Characteristics:

Full waterproof protection, since it prevents the possibility of faulty waterproofing at drain level. Usable with vertical or horizontal drain outlets, since it has a 40 mm outlet adapter. Swift and easy to use.

Recommended applications:

Specially designed for waterproofing wet rooms. For wet areas.

Wet rooms and shower trays

Wet rooms and shower trays

New concept of shower tray for exclusive wet rooms. This system provides a shower deck finish with porcelain tiles, achieving a flat and levelled surface without a visible drain. Tiles cover the drain located underneath and water drains across the open joints giving an outstanding contemporary design. Specially designed for bathroom refurbishments. Professional use only.

butech shower deck system **NEW PRODUCT**

Recommended applications:

Indoor shower trays.

Recommended coverings:

Par-ker from PORCELANOSA Grupo.
Ston-ker from PORCELANOSA Grupo.
URBATEK from PORCELANOSA Grupo.
Any antislip porcelain floor tile.

Main Characteristics:

Flat shower floor surface without slopes.
Concealed drain under the shower tray tiles.
Only 24 mm thick tray plus tiles.
3 mm open joint between tiles.
Reduced maintenance compared to wood decks.
